

Effective Decision-Making

A Building Better Leaders Program by Art Petty

Timely, effective decisions are rocket fuel for execution

Overview: Ideal for individuals and teams dealing with complex decision-issues. The program focuses on developing strategies to identify and mitigate decision-making traps as well as identifying methods to better frame issues and properly focus group discussions.

Audiences: Individual Contributors, Project/Product Teams, Managers and Management Groups

Available Formats:

- Half-day or full-day workshop programs for groups
- Two-hour programs for associations and large group meetings (mini-workshop format)
- Distance option for individual contributors
- Keynote format: 50 minutes for group sessions
- Coaching options (individual and group) for all formats

Learning Objectives:

- Increase awareness and understanding of the critical decision-making traps that commonly derail individuals and teams.
- Learn practical strategies to identify and minimize impact of decision-making traps.
- Gain experience with tools and discussion approaches that support improved framing, better use of data better organized and focused group discussions.
- Learn approaches for moving from idea generation to decision-development.
- Discover ideas and tools to measure, monitor and improve decision-making effectiveness.
- Build skills through hands-on case work. Depending upon program length, we apply the tools to a current decision-issue from your workplace.
